## ACTION TAKEN REPORT OF STUDENTS FEEDBACK 2024-2025

The institution is pleased to report that the majority of students have expressed high satisfaction with the curriculum and clinical training provided this academic year. To further enhance this positive learning environment, several proactive measures have been implemented. To build upon the existing clarity of our programs, all faculty members now conduct comprehensive orientation sessions at the start of each course, using the Academic Calendar to share clear goals and inspiring milestones with the students. Building on our strong clinical foundations, the college has successfully integrated Case-Based Learning modules, which allow students to see the immediate, positive impact of their theoretical knowledge when applied to real-world patient care.

To further empower our students' professional growth, we have expanded access to the Advance Simulation & Skills Centre, providing a safe and innovative space to master complex nursing skills using high-fidelity technology. We are also committed to maintaining our high academic standards through a supportive faculty monitoring system that ensures every topic is delivered with depth and excellence. Furthermore, the college has enriched its learning resources by extending library hours and launching new E-Library platforms, fostering a culture of independent research and lifelong learning. Finally, our enhanced mentoring and peer-learning programs continue to provide a nurturing atmosphere where every student receives the guidance and encouragement needed to excel in their nursing journey.
